

## HOLD ME

VERSE 1:           Lately things are changin'  
                      Between you and I  
                      The stars we hung to light our way  
                      Have fallen from the sky  
                      But there's no use pretendin'  
                      Our love could ever grow  
                      But still I wish you'd hold me  
                      One more time before you go

CHORUS:           Hold me  
                      Baby just hold me tonight  
                      'Cause when you hold me in your arms  
                      Everything's alright

VERSE 2:           I've heard it said before now  
                      In good time you'll forget  
                      But you can't forget the good times  
                      At least I haven't yet  
                      But sorries never help much  
                      So let's open a bottle of wine  
                      We'll raise a glass to good times passed  
                      Then hold me one last time

CHORUS:           repeat

BREAK:            music = verse

BRIDGE:           Out on the sea the sailor's got a death grip on the wheel  
                      Back in the field the farmer's hand is fixed upon the plow  
                      I don't mean to hold you down I want you to be free  
                      But the night's so long and I need someone just to hold me now

CHORUS:           repeat 2x
