

# KEWEENAW

- VERSE 1:           Left my home - Early this morning  
                      Headed north - On the long highway  
                      Seven hours - I'll be riding  
                      But this time out - I'm goin' to stay
- CHORUS 1:           Keweenaw - Your voice is calling  
                      Got a date - With a northern princess  
                      She and I - We got a love affair  
                      Way up there - Way up there
- VERSE 2:           Whitewater rolls - Over rocks and boulders  
                      Rushing down to - Lake Superior  
                      Just like me - I got a destination  
                      And in my mind - It's all so clear
- CHORUS 2:           Keweenaw - You know the answers  
                      From virgin hills - To the copper mine  
                      And I was born - For taking chances  
                      On something new - In a place so fine
- BREAK:               music = verse
- VERSE 3:           Now I don't know why - I've got to go there  
                      Got butterflies - I can't ignore  
                      Where the eagle flies - On wings of freedom  
                      Where money's scarce - But no one's poor
- CHORUS 3:           Keweenaw - I'm ready for you  
                      Your long hard winters - On frozen ground  
                      And when at last - This journey's over  
                      In a U.P. town - I'll settle down
- CHORUS 1:           Repeat
