

## PEACEFUL MEADOW

VERSE 1:           We've come a long way  
                      Since we first met  
                      From rulers and slaves  
                      So least we forget  
                      This path we've chosen  
                      Wasn't always so me-e-low  
                      We've come so far  
                      To this peaceful meadow

VERSE 2:           I love you  
                      I'll say it once more  
                      And you love me too  
                      We love where we are  
                      The way things are going  
                      We can only gro-o-ow  
                      And life is so fine  
                      In this peaceful meadow

VERSE 3:           The thistle and thorn  
                      Remind us of how  
                      Our lives were reborn  
                      To the here and the now  
                      The comfrey and thyme  
                      The mint and the ya-a-row  
                      Where worries unwind  
                      Through this peaceful meadow

BREAK:             -----

VERSE 4:           At last we know  
                      How wholeness feels  
                      In circles we dance  
                      Around the medicine wheel  
                      The wind's healing voice  
                      Where the sweet waters flo-o-ow  
                      Whispering "welcome"  
                      To this peaceful meadow
